Our numbers

100+

Custom business systems deployed for Ethiopian businesses, across 96 branches.

50+

Social media accounts managed for health, hospitality, education, finance and consumer brands.

37M+

Views across four flagship client accounts in 12 months.

329

Features in Blue Ocean ERP, across 21 modules and 56 standard reports.

87,890

Learners on Chekela, our online learning platform.

81K

TikTok followers on our own Blue Ocean Creatives channel.

20+

Technical and financial proposals and tenders prepared.

15+

Signed reference and recommendation letters from clients and institutions

23+

Full-time staff in three cities: Addis Ababa, Dire Dawa and Adama.

2. Foreword

Welcome to Blue Ocean Creatives.

When we started the company in April 2023, the gap we saw was simple to describe and hard to close. Ethiopian businesses were growing fast, yet most still ran on paper ledgers, disconnected spreadsheets and the memory of a few key people. And very few had a digital presence that matched the quality of what they sold.

Since then, we have closed that gap one business at a time. More than 100 businesses now run on systems we built, from single shops to multi-branch distributors managing 96 branches between them. Blue Ocean ERP, our own enterprise platform, runs 24-hour production floors, warehouses, fleets, payroll and finance for manufacturers from Sebeta to Dire Dawa. Our social media wing manages more than 50 accounts for brands in health, hospitality, education, finance, energy and retail, producing content in Amharic, Afaan Oromoo, Somali, Tigrigna and English. In the last year our four flagship accounts alone reached more than 37 million views.

We work differently from international software vendors. We build locally, so our systems fit how Ethiopian businesses actually operate: the documents, the approval chains, the branches, the credit and the language. We implement on site, with teams in Addis Ababa, Dire Dawa and Adama. And we stay after go-live, because a system only creates value when people use it every day.

Digital Ethiopia 2030 places homegrown technology and the modernisation of industry at the centre of national growth. That is the work we do every day. This profile sets out who we are, what we have delivered and how we work. We would welcome the chance to show you in person, ideally with a live demonstration of our systems.

Befekadu Feleke
Co-Founder, General Manager & Chief Operating Officer.

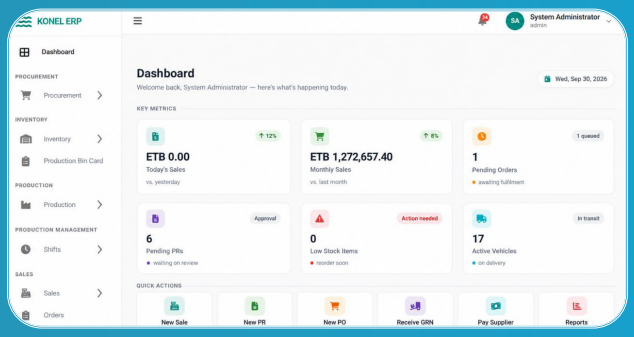

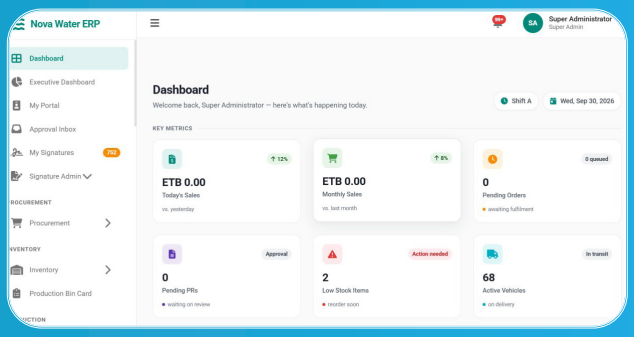

3. Who We Are

One partner for the systems behind your business and the marketing in front of it.

Blue Ocean Creatives helps Ethiopian businesses run better and grow faster through two connected practices.

Business Systems & Software

We design, build and implement enterprise resource planning (ERP) systems, stock and financial management systems, industry-specific management systems, online learning platforms, websites and mobile applications. Our flagship product, Blue Ocean ERP, is a modular platform with 329 features across 21 modules, built and hardened inside a live, 24-hour manufacturing plant. We also implement and customise Odoo for clients who prefer an international platform.

Digital Marketing, Social Media & Creative

We plan, produce and manage social media, video, paid advertising and brand content for companies that want to reach the right audience and turn that attention into customers. We manage more than 50 accounts, and our in-house studio and regional production teams create content in Amharic, Afaan Oromoo, Somali, Tigrigna and English across Facebook, Instagram, TikTok, YouTube, LinkedIn and Telegram.

Because both practices sit under one roof, our clients get something rare in this market: a partner that understands both their operations and their customers.

What we have delivered

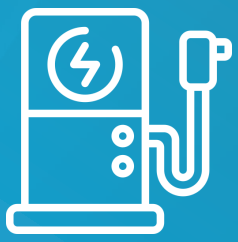

ERP systems for manufacturers, advertising and printing companies, financial service firms, distributors, wholesalers, importers and exporters.

Stock and financial management systems for retailers, wholesalers and multi-branch businesses.

Supermarket, restaurant, café and pastry management systems.

EV charging station management systems.

Online learning platforms for training institutes and secondary-school students.

B2B wholesale and supplier management platforms.

Social media management, video production and paid campaigns for more than 50 brands in health, hospitality, education, finance, energy, construction, food and retail

Websites for companies, clinics and international NGOs.

Mobile applications for public health, education and road safety.

Digital marketing training courses, delivered in person and published online on Chekela.

4. Our Story

Blue Ocean Creatives began with a conversation between two old friends.
Dawit Lake Netere was building technology companies in Europe. He had worked as a ServiceNow developer and consultant at Deloitte Central Europe, co-founded and exited LearnGo, a SaaS platform for SMEs and training centres, and run a direct-to-consumer coffee business in Poland. Befekadu Feleke had moved from television commercials for national brands into digital work at Raphon Advertising in Addis Ababa, joining in August 2022 as a content writer, social media manager and website developer and becoming Digital Development Manager within six months. Leading websites, company profiles and service catalogues for corporate clients, he saw every day how much Ethiopian businesses were missing out on.

Their conversation kept returning to the same point. Ethiopia had talented people, growing companies and a young, fast-connecting population, but most businesses were still run by hand and invisible online. In April 2023 they founded Blue Pixel Trading PLC, trading as Blue Ocean Creatives, on one conviction: Ethiopian businesses deserve technology and marketing built around how they actually work. The company started as a digital solutions provider with two offers, social media management and stock and financial management systems, and Befekadu personally trained the founding team to deliver them.

The company grew on two tracks at once. On the systems side, a stock management system for shops and warehouses spread through referrals. As clients outgrew it and asked for production, procurement, HR and finance, that demand became full ERP implementations, and eventually Blue Ocean ERP. On the marketing side, a small social media desk grew into a full social media wing with its own creative director, designers, videographers, editors, hosts and media buyer, now managing more than 50 accounts. In the same year the company launched Chekela, an online learning platform that has since reached 87,890 learners.

Today Blue Ocean Creatives employs more than 23 full-time staff in Addis Ababa, Dire Dawa and Adama, has more than 100 systems in daily use, and holds signed references from clients in both practices.

Milestones

2026

Blue Ocean ERP reaches 329 features across 21 modules and is live at Konel Natural Purified Water, a 24-hour, three-shift bottling plant. Chekela recognised within the iceaddis Venture Meda accelerator. Social media wing passes 50 managed accounts, and the team grows past 2 full-time staff.

2025

Two rounds of our social media training course at Nisir Training Center (March), later published online on Chekela. Adama production team established in April and Dire Dawa team (IT and social media) set up. Stock and financial management systems pass 100 client businesses. Odoo implementations delivered for Nokdes Trading and Nova Water.

2024

First full ERP implementation. Chekela recommended to secondary schools by the Addis Ababa City Education Bureau. Long-term digital marketing engagements begin with Apex Financial Solutions and Peniel Training Institute.

2023

Blue Pixel Trading PLC founded in Addis Ababa in April. First stock and financial management systems and first social media clients. Chekela online learning platform launched.

5. Mission, Vision and Values

Mission

To give Ethiopian businesses the systems to run well and the digital presence to grow: built locally, delivered on site and measured by results.

Vision

To be the partner Ethiopian businesses trust most for business systems and digital growth, helping Ethiopian enterprises compete with the best in the region.

Our values

Ownership

We treat every client's operation as if it were our own. When something breaks, we fix it first and explain it after.

Clarity

Plain language, clear scopes and visible progress. No jargon and no surprises.

Evidence

We report what the data shows. Every result we claim can be traced to a record, a system or a signed letter.

Closeness

We work where our clients work: on the factory floor, in the warehouse and at the shop counter.

Craft

Clean engineering and good design matter, because people use our work every day.

Why **Blue Ocean Creatives**

What sets us apart	What it means for you
We own our platform	We treat every client's operation as if it were our own. When something breaks, we fix it first and explain it after.
Built for Ethiopian operations	Multi-branch stock, cash and credit sales, cheques, agents and truck sales, VAT, excise and withholding, local approval chains and English and Amharic interfaces are designed in, not bolted on.
Proven in live operations	Our ERP was built and hardened inside a 24-hour, three-shift manufacturing plant, and more than 100 businesses run on systems we built.
On the ground	Resident teams in Addis Ababa, Dire Dawa and Adama run workshops, training and support in person, not only through remote tickets.
Control, not just records	Our systems are designed to decide what is allowed to happen: separate approval rights, maker-checker controls and audit trails on every action.
One partner, operations to audience	The same company that runs your stock, production and finance can run your social media and campaigns, with one accountable team.
Multilingual reach	Content and community management in Amharic, Afaan Oromoo, Somali, Tigrigna and English, with production teams on the ground in Dire Dawa and Adama.
Results we can show	More than 37 million views across four flagship accounts in 12 months, documented in platform analytics rather than estimated.
Verified by our clients	Signed reference letters from manufacturers, distributors, financial firms, training institutes and a city education bureau.

7. Ethiopia's Digital Moment

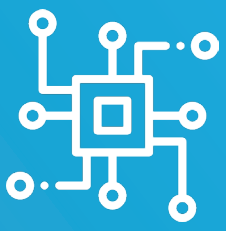

Aligned with Digital Ethiopia 2030

In December 2025 the Government of Ethiopia launched Digital Ethiopia 2030, the five-year national strategy that succeeds Digital Ethiopia 2025. Its objectives include accelerating inclusive digital economic growth, scaling SMEs and modernising key sectors, and its guiding principles include homegrown, interoperable and secure digital solutions. Our work contributes directly.

Modernising industry

Blue Ocean ERP digitises production, inventory, quality, procurement and finance for Ethiopian manufacturers, the productivity gains the strategy links to industrial competitiveness.

Homegrown technology

Our platforms are designed, built and supported in Ethiopia by Ethiopian engineers.

SME growth

Our stock management systems and marketing services are built for small and growing businesses, not only large enterprises.

Digital skills and education

Every implementation includes hands-on user training, and Chekela brings grades 9–12 learning content online for Ethiopian students.

The opportunity in numbers

100+

people in Ethiopia, with a median age of 19.1.

29.5M

internet users, 21.7% of the population.

93.2M

mobile connections, equal to 68.4% of the population.

9.8M

social media user identities, up 28.9% in one year.

1.8M

LinkedIn members, up 38.5% in one year.

1.55M

Instagram users, up 29.2% in one year.

A young, fast-growing population and a national push to modernise industry mean rising volumes and tighter competition. Businesses that still reconcile stock, production and cash by hand lose margin they cannot see. Brands that are not visible where more than two million new social media users arrived in a single year lose customers they never knew about. The companies that move first will set the pace for their sectors.

8. Business Systems & Software

Business systems built for how Ethiopian companies work.

For manufacturers, distributors and multi-branch businesses, the cost of disconnected operations is hidden but real: stock that never reconciles, production losses nobody measures, credit nobody chases and payroll done by hand. We build and implement the systems that close those gaps, and we stay on site until they work.

Blue Ocean ERP

One platform for production, inventory, sales, people and finance.

Blue Ocean ERP is our proprietary, web-based enterprise resource planning platform, designed in Ethiopia for Ethiopian manufacturers and enterprises. It was built and hardened inside a live, 24-hour, three-shift manufacturing plant rather than assembled from a template. It connects every department to a single source of truth, so management sees production, stock, sales, cash and people in real time, from any branch.

329

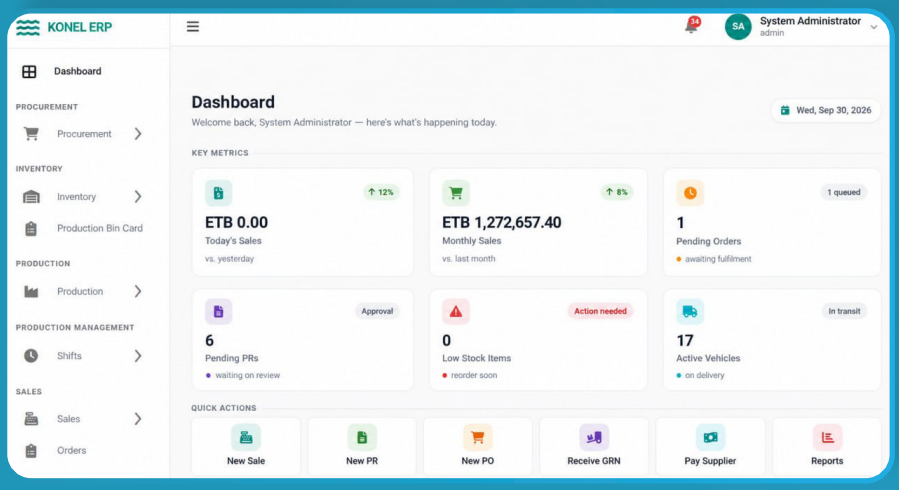

discrete, working features, counted individually rather than estimated.

21

modules: 5 cross-cutting control engines and 16 functional modules.

56

standard reports across operations, commercial and finance

23

separately permissioned action types, from view and create to approve, post and reverse

8

industry verticals supported, with modular licensing so you receive only what you use.

Five control engines

These run underneath every module and are what make Blue Ocean ERP a control system, not just a record-keeping system.

Access control

23 independently permissioned actions. Seeing a number never grants the right to change it, and the control holds at every layer, not just on screen. Every role sees exactly what the job needs and nothing more.

Workflow and sign-off

Maker, checker and approver are always different people. Approval chains follow your own organisation.

Document control and audit

Every action is stamped with who, what and when. Change a key field on a signed document and the affected signatures are invalidated automatically, with the change recorded.

Notifications

Alerts and escalations by Telegram and in-system messages, so issues reach the right person the same shift.

Master data

One consistent register of items, units, partners, vehicles and employees, with unit conversion handled everywhere.

Functional modules

Operations

Procurement and supplier management

- Inventory and warehousing with digital bin cards and weighted-average valuation.
- Production planning, bills of materials, shift and batch records.
- Quality control built on your own approved forms.
- Maintenance and downtime management.
- Dispatch, fleet and logistics.
- Returnable container management.

Commercial

Sales, orders and invoicing

- Point of sale.
- Customer and trading-partner management · Credit, advances, cheques and receivables aging.
- Agents, distribution points and truck sales.

Corporate

Finance and accounting

- Ethiopian tax (VAT, excise and withholding on configurable rates).
- Budget versus actual.
- Human resources.
- Biometric and face-recognition attendance
- Payroll with payslips and bank transfer files
- Executive dashboards and analytics.

Capabilities our clients value most

Dispatch under real control

A six-gate chain across four departments: loading order, stock check, payment, deposit verification, gate pass approval and vehicle release. No step can be skipped, and whoever recorded a payment cannot approve it.

Waste caught the same shift

Material consumption is checked against the bill of materials on every run, and over-consumption is flagged before the shift ends, not at month end.

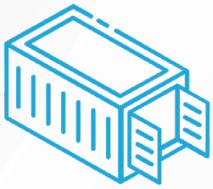

Production you can see

Targets per item, per shift and per date, tracked live against actual output, with wastage recorded by reason and batch-level cost reporting.

Your paper forms, digitised exactly

Quality forms reproduce your approved documents field by field: parameters, units, limits, sample points and frequencies, verified against the original before go-live.

Containers that reconcile

Returnable containers tracked per trading partner and per vehicle, because vehicle level is where the disputes happen.

Attendance to payroll in one flow

Biometric or face-recognition clock-in feeds overtime, leave and penalties straight into the payroll run.

A closed maintenance loop

Downtime logged by production, the mechanic notified on Telegram, unresolved issues escalated and the repair closed against the original downtime record.

Ethiopian tax as a setting

VAT, excise and withholding rates are configurable, so a statutory change is a settings update, not a development project.

Platform

Web-based: works from any branch on computer, tablet or phone.

Multi-branch, multi-warehouse and multi-company.

English and Amharic interfaces.

Integrations with biometric terminals (ZKTeco), Telegram and QR-code scanning.

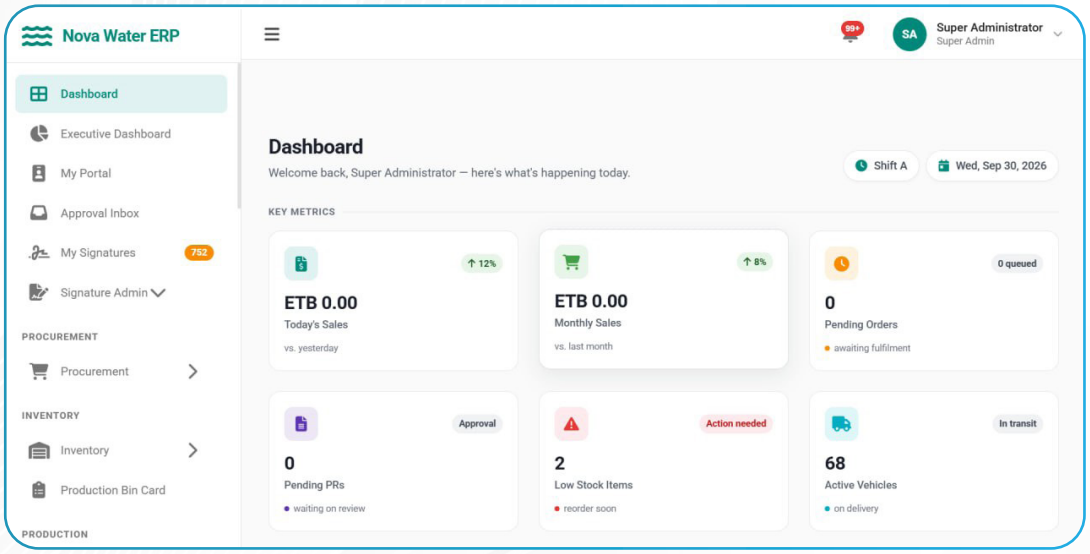

Configurable document numbering and print formats for invoices, vouchers and receiving notes.

Modular licensing: you receive only the modules your operation needs.

Odoo implementation

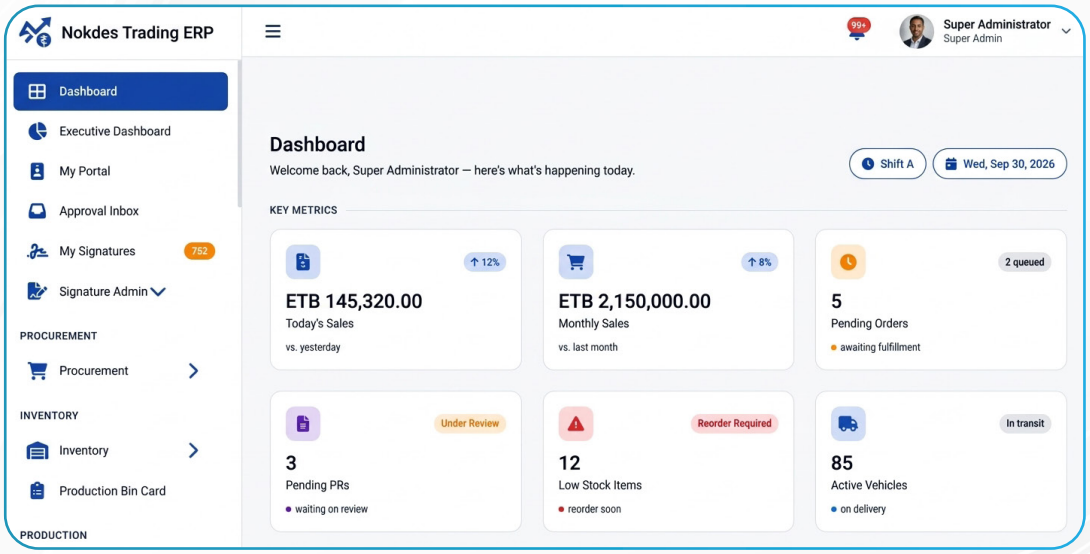

For clients who prefer an international platform, we implement and customise Odoo, from process mapping and configuration to custom modules, data migration, training and support.

Nova Water (Melayan Manufacturing PLC), Sebeta

Integrated Odoo ERP covering manufacturing, inventory, purchase, sales, quality, maintenance, barcode, accounting, invoicing, employees and expenses. Delivered in three months and in daily use.

Nokdes Trading PLC, Addis Ababa

A B2B wholesale and supplier management platform on Odoo, with custom modules for gated trade pricing, multi-supplier order separation and commission handling.

Stock and financial management systems

Our first product, and still one of our most widely used. Our stock and financial management systems give owners of shops, wholesalers, supermarkets and multi-branch businesses live control of stock, sales, cash and branch performance, without the cost or complexity of a full ERP.

- Deployed in more than 100 businesses in Addis Ababa and regional cities, across multiple sectors.
- 96 branches managed.
- Stock in and out across branches, branch transfers, point of sale, credit sales, low-stock alerts, and owner and branch reports.
- A clear upgrade path to Blue Ocean ERP, with your data carried forward.

Industry management systems

We build complete operational systems for industries where generic software does not fit.

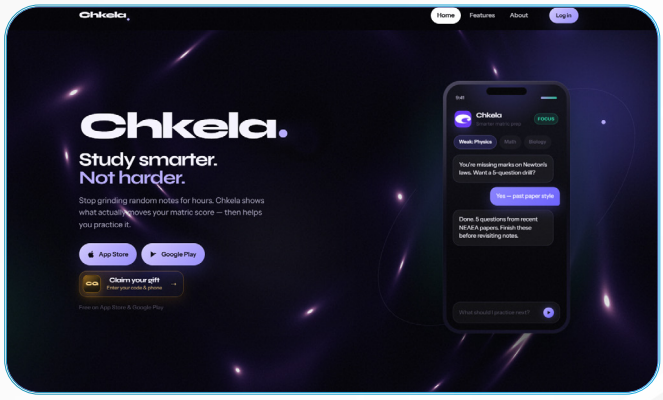

Industry	What we build
Multi-branch retail and distribution	Inventory, sales, purchasing, customer credit, branch transfers, foreign-currency payables and 25 standard reports across multiple locations.
Import and distribution	Purchasing, QR-code receiving, multi-warehouse stock, shop requests with approval, warehouse issue, in-transit visibility, POS, credit and finance, with a full English and Amharic interface.
Supermarkets	Point of sale, stock, pricing, suppliers, branches and daily sales reporting.
Restaurants and cafés	Orders, menu, recipes with wastage thresholds, stock, shifts, waiter performance, credit customers and QR menus.
Pastry and bakery	Production batches, display stock and fridge stock tracked separately, expiry control, waste management, cake pre-orders and a dedicated. pastry POS
EV charging stations	Charging sessions by charger and officer, kWh-based billing, photo evidence of meter and payment, daily cash reconciliation and mobile-money tracking.
Advertising, printing and job shops	Projects per job, task workflow by department, leads and clients, invoicing with aging, inventory vouchers and staff time tracking.
Energy distribution	Sales, credit approvals, agents, mobile stock and trips, logistics, cheques and asset management

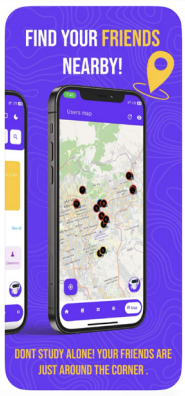

Custom software, web and mobile

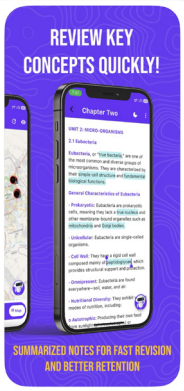

When an off-the-shelf system does not fit, we build one that does, from requirements through to support.

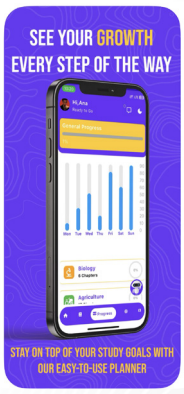

- Operational systems and web platforms.
- Mobile applications for customers, staff and field teams.
- Online learning platforms with courses, checkout, certification and learner dashboards.
- Company and institutional websites.
- Integrations with biometric devices, messaging platforms and third-party systems.

Chekela: our education technology platform

Chekela (www.chkela.com) is the online learning platform launched in 2023, co-founded by our General Manager Befekadu Feleke and operated by Blue Pixel Trading PLC. It started with teacher-prepared lessons for secondary-school students in grades 9 to 12, with chapter quizzes, mid-term and final exams, matriculation revision and past national exam questions, and has grown into a wider learning platform with professional courses in web development, mobile development and digital marketing.

87,890
learners registered on the platform.

43
active courses, from high school subjects to web and mobile development.

28.3K
monthly active users on Android, with apps on Google Play and the App Store.

105.8K
TikTok followers and 543.6K likes on the Chekela channel.

- An AI tutor that answers in English, Amharic, Afaan Oromoo, Tigrigna and Somali, plus AI exam generation from images, a study planner, communities, offline videos and a leaderboard.
- Recommended by the Addis Ababa City Government Education Bureau to all secondary schools in the city.
- Recognised within the iceaddis Venture Meda accelerator as a credible and promising digital learning venture.
- Home of Blue Ocean Creatives' digital marketing course, taught by our own team.

9. Digital Marketing, Social Media and Creative

Marketing that builds brands and brings in customers.

More than two million Ethiopians joined social media in a single year. The brands winning that attention are not the ones posting the most. They are the ones with a clear strategy, content people want to watch and the discipline to measure what works. That is what we do, from our studio in Addis Ababa and with resident production teams in Dire Dawa and Adama.

50+

social media accounts managed, every one under a named strategy lead.

37M+

views across four flagship accounts in 12 months.

05

content languages: Amharic, Afaan Oromoo, Somali, Tigrigna and English.

96K+

followers on our own TikTok and Instagram channels.

Services

Social media management

Strategy, content calendars, daily publishing, community management and monthly reporting.

Content and video production

Scriptwriting, on-site filming, video editing, motion graphics, photography and graphic design, with on-camera hosts

Paid advertising

Campaign strategy, audience targeting, ad creative, A/B testing and budget optimisation on Meta, TikTok, Google Ads and Telegram Ads, focused on leads and cost per lead.

Analytics and conversion tracking

Google Analytics 4, Google Tag Manager and platform pixels, tracking calls, WhatsApp and Telegram clicks, enquiries and form submissions.

YouTube and long-form content

Channel strategy, long-form storytelling and production that builds audience retention and organic growth

Branding and identity

Logos, visual identity, brand guidelines and launch assets.

Influencer collaborations

Matching brands with the right creators, briefing and campaign management.

Digital strategy and analytics

Audits, competitor analysis, KPI frameworks and performance reporting.

Websites and landing pages

Conversion-focused websites built by our own engineering team.

Community management

Timely replies to comments and inbox messages, livestreams and Q&A sessions, with sensitive questions escalated to the client.

Training and capacity building

Digital marketing, content and paid ads training for in-house teams, delivered in person or through Chekela.

Platforms we manage

The largest audience in Ethiopia: reach, community and lead generation

Visual brands, lifestyle, hospitality, health and beauty.

Short-form video, discovery and younger audiences.

Long-form storytelling, education and brand authority.

B2B, corporate reputation, recruitment and institutional audiences.

Direct updates, communities, customer service and offers.

How we work

Audit

We review your channels, audience, competitors and results to set a clear baseline.

Strategy

We agree goals, audiences, platform roles, content pillars and KPIs with you in writing.

Create

Our studio produces designs, videos and copy in your brand voice, in Amharic, English or both.

Publish and engage

Scheduled publishing and active community management: comments, messages and replies.

Amplify

Paid campaigns and creator partnerships extend your reach beyond existing followers.

Measure and improve

Monthly reports from platform analytics, with clear actions for the next month.

Our creative strengths

For clients who prefer an international platform, we implement and customise Odoo, from process mapping and configuration to custom modules, data migration, training and support.

Amharic-first content

written and produced for Ethiopian audiences, not translated as an afterthought.

Nationwide reach

through campaigns designed to scale quickly across regions.

On-site production

in Addis Ababa, Dire Dawa and Adama.

Cinematic video and scriptwriting

for both short-form and long-form formats.

Complex ideas made simple

financial, educational and technical services turned into content audiences engage with.

Honest reporting

from Meta Business Suite and TikTok Analytics.

Verified campaign results

Health-sector experience

Health communication has to be accurate, culturally appropriate and approved before it is published. Our health and wellness accounts include Lavish Medical Spa (Addis Ababa, Dire Dawa and Adama), Fikreselam General Hospital, Harme Medical Center, Union Specialty Dental Clinic and Radiant Health Club.

Training and capacity building

In March 2025 we ran two in-person rounds of our social media training course at Nisir Training Center, covering introduction to digital marketing, graphic design, video editing and paid ad management. To reach learners nationwide, we then filmed the full course and published it on Chekela, where it runs on demand.

We practise what we sell

- Blue Ocean Creatives on TikTok: 81,000 followers.
- Blue Ocean Creatives on Instagram: 14,700 followers.
- Blue Ocean Afaan Oromoo channels on TikTok and Instagram.
- An ERP education series on TikTok, hosted in Amharic by our General Manager.

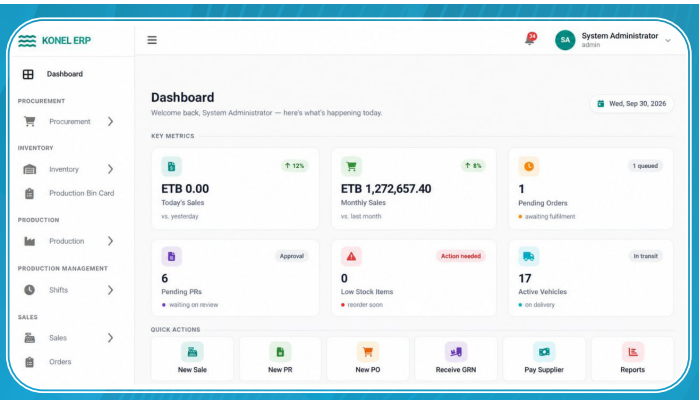

10. Industries We Serve

Industry	What we have delivered	Clients include
Water and beverage bottling	Full ERP from procurement to fleet, quality control, wastage tracking and biometric attendance	Konel Natural Purified Water PLC (Dire Dawa), Nova Water – Melayan Manufacturing PLC (Sebeta)
Manufacturing, advertising and printing	ERP covering procurement, inventory, production and job orders, sales, finance, HR and audit trails	Vector Advertising and Manufacturing PLC, Raphon Advertising
Energy and fuel distribution	Customised ERP for LPG distribution; EV charging station management; nationwide digital campaigns	Wow Energy Services PLC (Smart Gas), Kasanchis EV, Evolve Import and Export
Wholesale, distribution and im-port	Multi-branch operations, B2B wholesale platforms, QR receiving, stock, POS, credit and finance	Rungo, Nokdes Trading PLC, Abel Fikadu Importer
Retail and supermarkets	Stock and financial management systems across 96 branches	100+ businesses
Food, bakery and hospitality	Café and pastry management systems; brand identity, social media and resort content	Bigne Pastry, Liesak Resorts Hotel, Tesfu Hotel and Mall, Fana Queen Café & Restaurant, Coffee Prince, Gursha Hub
Financial services	ERP, digital training platform and ongoing digital marketing	Apex Financial Solutions
Education and training	Online learning platforms, college management app, digital marketing for student recruitment	Chekela, Apex Tax School, A.A. Tegbare-ID Polytechnic College, Peniel Training nstitute
Health and wellness	Public-health mobile app; premium website, social media and paid campaigns	Ministry of Health – Ethiopia, Lavish Medical Spa, Fikreselam General Hospital, Harme Medical Center, Union Specialty Dental Clinic, Radiant Health Club, Champion Gym
Construction, engineering and business services	Social media management, con-tent production and YouTube	Builders Creamy Trading PLC, Tiguhan Construction, Phi Engineering Solutions, Hoha Engineering PLC, AG Grace Business Center
Consumer goods, fashion and retail	Social media, brand identity and product content	Senay Soap and Detergent, Moa Genuine Leather, Alpha Male Clothing, Say Yes Bridal, Urban Glow Shopping, Keyab Kids, BeMaleda Trading PLC
NGOs and development	Websites and digital platforms	Selam Ethiopia
Textiles	Order management system and social media	Demka Textile Investment

11. Selected Projects

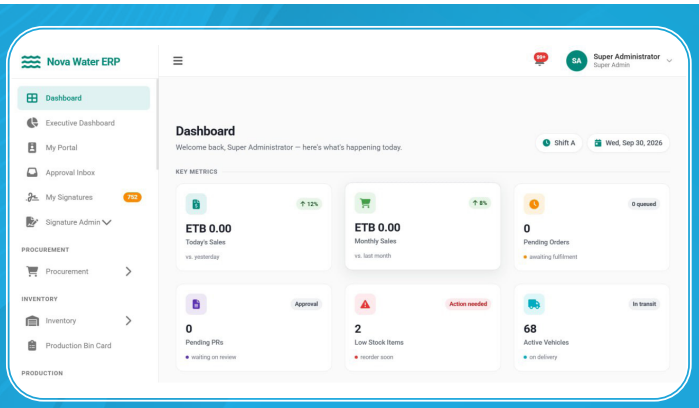

Business systems and software

01. Konel Natural Purified Water PLC · Water bottling · Dire Dawa

Konel runs a 24-hour water bottling factory in three shifts. Before Blue Ocean ERP, purchasing, stock, production, quality, sales and finance were recorded on paper or in Excel. We implemented Blue Ocean ERP across the whole operation: purchasing, inventory with digital bin cards, integrated production and quality control, finished goods, sales through factory, vehicle and branch channels, human resources and finance. We converted the factory's manual production workbooks into system specifications and added wastage tracking by reason. The system has been in live operation since mid-2025, supported by our resident team in Dire Dawa.

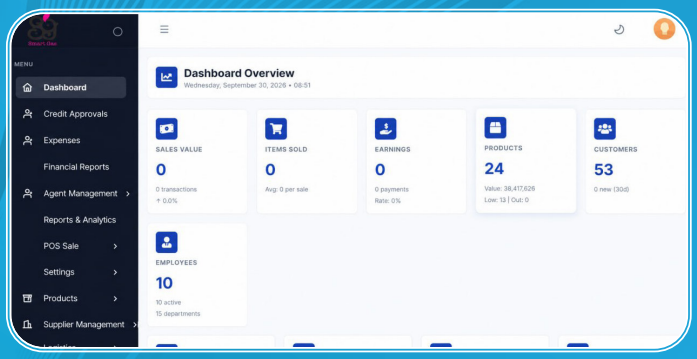

02. Nova Water (Melayan Manufacturing PLC) · Water bottling · Sebeta, Oromia

An integrated Odoo ERP for the Nova Water bottling plant covering procurement, raw and packaging material control, production, quality control, plant maintenance, finished goods, sales and accounting. The system includes bills of materials, manufacturing orders by work centre with shift output reporting, quality checkpoints with rejection and rework, lot and batch traceability with digital bin cards, procurement approval with reorder automation, preventive maintenance and production costing. Plant processes were documented before configuration, records were migrated and verified, and staff were trained before go-live. Delivered within the agreed three months and in daily use.

Business systems and software

03. Wow Energy Services PLC (Smart Gas) · LPG distribution · Addis Ababa

Smart Gas

A customised ERP for one of Ethiopia's LPG distributors, covering sales and customer management, purchase and supplier management, inventory and multi-location stock, financial management and reporting, agents, credit approvals, logistics, role-based access control and notifications, with deployment, training and post-go-live support.

04. Vector Advertising and Manufacturing PLC · Advertising and manufacturing · Addis Ababa

VECTOR
INNOVATIVE SOLUTIONS FOR ADVERTISING

A full-scale ERP for a signage, fabrication and advertising production company where every order is bespoke. The system covers procurement and suppliers, inventory and warehouse management, production and job-order tracking through each department, sales and client management, finance, HR, role-based access with audit trails, and management dashboards. It manages more than a thousand concurrent projects.

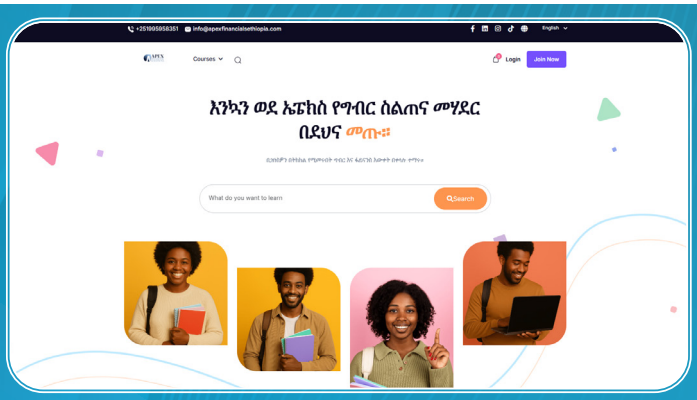

05. Raphon Advertising · Printing and advertising · Addis Ababa

RAPHON
ADVERTISING

An ERP tailored to a large-scale printing and advertising company with many departments and workflows, integrating project tracking, inventory, procurement, finance, HR and customer relations in one platform.

Business systems and software

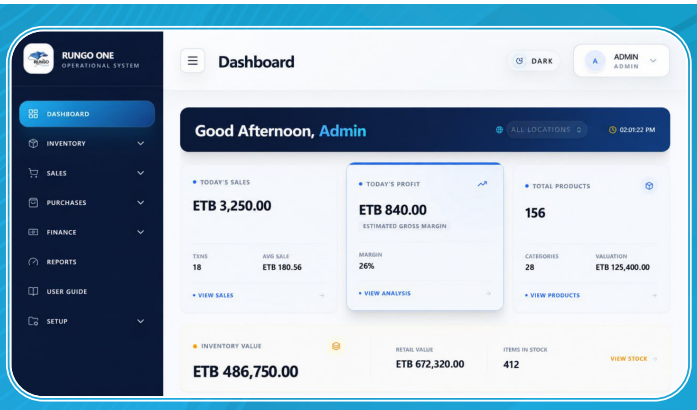

06. Apex Financial Solutions · Financial services · Addis Ababa

APEX FINANCIAL SOLUTIONS

An ERP with billing, invoicing and financial tracking, user role management and audit-ready reporting, together with the Apex Tax School digital training platform: online course delivery, certification management and learner dashboards for Ethiopian tax and finance courses.

07. Rungo · Liquor retail and distribution · 11 locations

RUNGO
YOUR LIQUOR STORE

Rungo One Operational System unifies inventory, sales, purchasing, finance and reporting across 11 locations, including one in Djibouti. It covers controlled branch transfers, customer credit with aging, live foreign-currency payables, days-of-stock forecasting, expiry alerts, brand-owner reporting, audit logs and 25 standard reports.

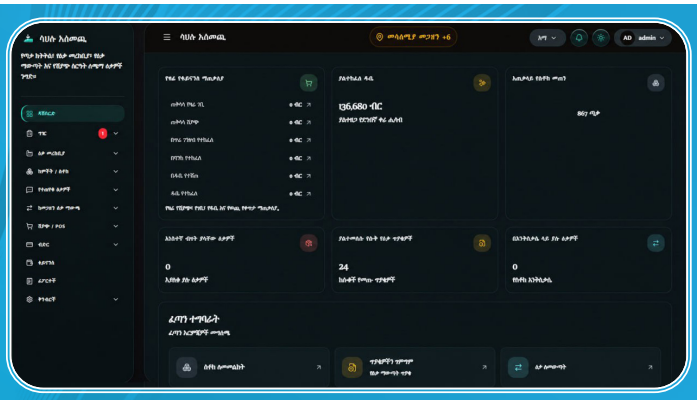

08. Nokdes Trading PLC · Wholesale and distribution · Addis Ababa

NOKDES
General Trading PLC

A B2B wholesale and supplier management platform on Odoo. Verified business buyers see trade prices that stay hidden from the public. Orders spanning several suppliers are automatically split into per-supplier deliveries, invoices and payables. The platform also handles commission rules, supplier payouts, multi-location stock and management reporting.

Business systems and software

09. Abel Fikadu Importer · Import and distribution

ABEL FIKADU IMPORTER
IMPORT AND DISTRIBUTION

An end-to-end system for a shoe-materials importer across one central warehouse, three warehouses and three shops: purchasing, QR-code receiving, stock, shop requests with approval, warehouse issue with in-transit visibility, QR-code POS, credit and finance. The whole interface switches between English and Amharic.

10. Kasanchis EV · EV charging

KASANCHIS EV
EV CHARGING

A management system for an EV charging operation with 16 charging points. Every session records the charger, officer, vehicle, battery level on arrival, kWh delivered and amount paid, with photos of the meter and the payment attached. Daily cash reconciliation, mobile-money and bank tracking, expenses and separate edit rights complete the controls.

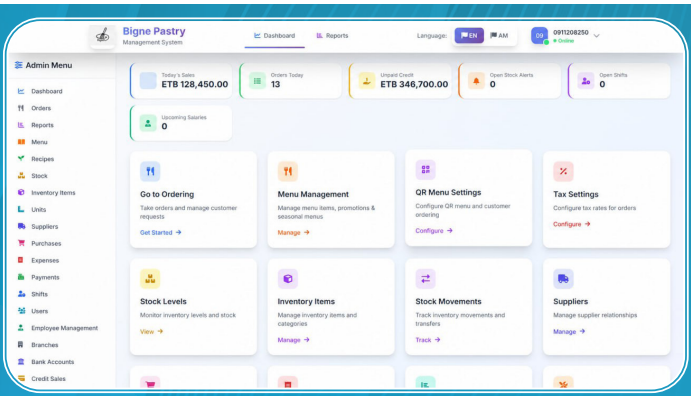

11. Demka Textile · Textile manufacturing

DEMKA® Group

An order management system delivered against a formal system requirements document, with a delivery report on completion.

Business systems and software

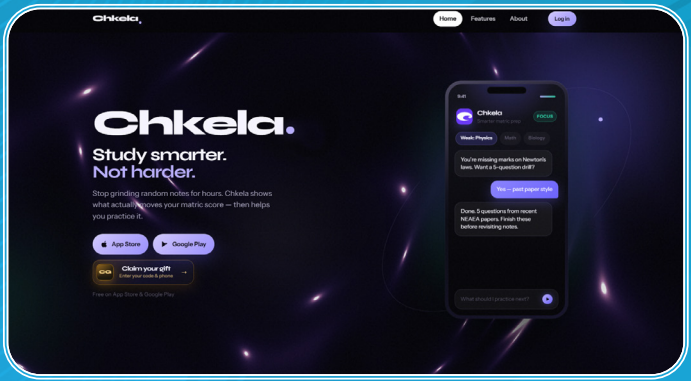

12. Bigne Pastry · Café and bakery

bigne

A café and pastry management system with a dedicated pastry production module: recipes with wastage thresholds, production batches, display and fridge stock tracked separately, waste management, cake pre-orders, QR menu, waiter tracking, shifts, credit sales, multiple branches and an English and Amharic interface.

13. Chekela · Online learning for grades 9–12

Our own education technology product, recommended to secondary schools by the Addis Ababa City Education Bureau and recognised within the iceaddis Venture Meda accelerator.

14. Ministry of Health – Ethiopia · Public health

ጤና ሚኒስቴር - ኢትዮጵያ
MINISTRY OF HEALTH-ETHIOPIA

The COVID-19 Living Guide Ethiopia mobile app and admin dashboard, used internally for clinical guidance and analysis and published as a public information app on Google Play.

Business systems and software

15. A.A. Tegbare-ID Polytechnic College · Education

A student and teacher management app covering sections, courses, announcements, assignments and student records.

16. Houfa · Road safety

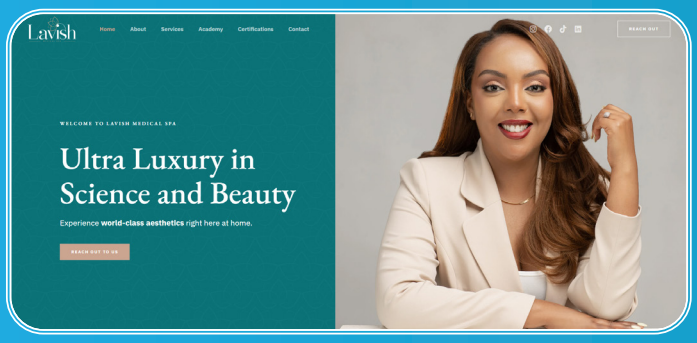

A traffic emergency alert app for reporting and locating road accidents, with live location sharing and an SOS function, available in Kenya.

17. Selam Ethiopia · International NGO

A website for an international NGO working in culture since 2005, with news, programmes and newsletter sign-up.

Business systems and software

18. Lavish Medical Spa · Health and aesthetics

A premium website for a medical spa with locations in Addis Ababa, Dire Dawa and Adama, including service categories, certifications, client testimonials, a training academy section and booking on every page.

Digital marketing and social media

01. Lavish Medical Spa · Health and aesthetics

Our flagship health account. We run strategy, content production, on-camera hosting, community management and paid campaigns for all three branches, with the Dire Dawa branch served in Amharic, Afaan Oromoo and Somali and the Adama branch handled by our resident Adama production team. In the 12 months to February 2026, the Addis Ababa account reached 13 million TikTok views and 4.2 million Meta views, and the Dire Dawa account 3.9 million TikTok views. We also built the brand's website.

02. Apex Financial Solutions · Since August 2024

Full digital marketing and content production across TikTok, Facebook and Instagram: strategic planning, content development, multimedia production, social media management and paid advertising. Our campaigns consistently generate high-quality leads for Apex's corporate services, training and financial service offerings. In the 12 months to February 2026 the account reached 3.4 million Meta views and 2.3 million TikTok views, adding 11,200 new Meta follows.

Digital marketing and social media

03. Peniel Training Institute · Since August 2024

Social media strategy, content planning, multimedia production, digital campaigns and audience engagement across TikTok, Facebook and Instagram, supporting student recruitment across more than ten professional training fields and increasing enrolment inquiries from across Addis Ababa. The account reached 8.3 million Meta views with 18,700 link clicks, plus 2.2 million TikTok views.

04. Evolve Import and Export · Electric vehicles · Nationwide

An Amharic-language digital campaign to reach a nationwide audience in the emerging electric vehicle market, covering content planning, scriptwriting, content production, video editing, graphic design and platform management.

05. Builders Creamy Trading PLC · Construction

Strategic social media management and content production in Amharic, including content planning, script development, on-site production, video editing, graphic design and ongoing platform management.

06. AG Grace Business Center

Full stewardship of the brand's social media and YouTube presence: strategic consulting, cinematic video and scriptwriting, and paid campaigns. Our long-form YouTube storytelling measurably increased audience retention, brand authority and organic channel growth.

Digital marketing and social media

07. Liesak Resorts Hotel · Hospitality · Bishoftu

Social media management, resort and event content, and promotional video for a resort hotel.

08. Fikreselam General Hospital · Healthcare

Social media content and campaigns for a general hospital's services.

12. What Our Clients Say

Business systems

"The ERP system enabled better visibility, improved decision-making, and streamlined operations across departments. We confidently recommend Blue Pixel Trading PLC for ERP and enterprise system implementation projects."

— Suleman Ali, General Manager, Wow Energy Services PLC

"The system delivered has positively impacted efficiency, traceability, and decision-making within our organization."

— Kassaye Tsegaye, CEO, Vector Advertising and Manufacturing PLC

"The system is in daily operation. Material consumption, production output and finished goods are recorded against traceable batches, quality decisions are captured in the system rather than on paper, and purchasing follows actual plant requirements."

— Ayub Ahmed, Chief Executive Officer, Melayan Manufacturing PLC – Nova Water Bottling

"The solution significantly improved operational efficiency, reporting accuracy, and digital service delivery for our organization. We found their team to be reliable and highly competent in delivering enterprise-grade digital systems."

— Brook Legesse, General Manager, Apex Financial Solutions

"Blue Ocean Creatives were technically strong, responsive and familiar with the commercial realities of wholesale trading in this market. We would engage them again."

— Mikiyas Fekade, General Manager, Nokdes Trading PLC

"The result has been a smoother internal workflow, increased accountability, and improved decision-making through real-time data access."

— Selamawit Solomon, Raphon Advertising

"Over this period, the system has brought a clear improvement in stock visibility, purchasing and sales control, production and quality control, human resource management and financial management. We recommend Blue Pixel Trading as a trusted partner for manufacturing ERP development and implementation."

— Dawit Mengesha Biru, General Manager, Konel Natural Purified Water PLC (translated from Amharic)

"Blue Pixel Trading PLC, through its Chekela product wing, has the technical and organizational commitment required to design, build, and improve digital products in a structured and responsive manner."

— Selamawit Solomon, Raphon Advertising

Digital marketing

"Their paid advertising management has been instrumental in driving measurable business outcomes. Through well-targeted campaigns and data-driven optimization, they have consistently generated high-quality leads."

— Brook Legesse Berhe, General Director, Apex Financial Solutions

"Their work significantly enhanced online engagement and contributed to increased enrollment inquiries from audiences across Addis Ababa."

— Ghenet Hailemichael, Dean of Academic Affairs, Peniel Training Institute

"We regard Blue Ocean Creatives as a highly capable digital agency with strong reach-building capacity, particularly for brands seeking rapid visibility and nationwide exposure."

— Mekibeb Nigash, HR & Administration Manager, Evolve Import and Export

"Their team worked in a structured and dependable manner, consistently delivering content on schedule while maintaining high standards of quality and brand consistency."

— Builders Creamy Trading PLC

"Blue Pixel Trading PLC represents the gold standard in modern content production and strategic growth."

— Azeb Negussie, Administration and Finance Manager, AG Grace Business Center

"Since Blue Ocean Creatives started running our social media, things really changed for my café. More people come around now, and we get better online presence."

— Fahmi Adus, CEO, Fana Café and Restaurant

"Blue Ocean Creatives brought our vision to life with precision and flair. Their expertise and commitment made them the perfect partner for our digital growth."

— Dr. Melat Solomon, CEO, Lavish Medical Spa

15. Leadership

Dawit sets Blue Ocean Creatives' strategic direction and leads its long-term positioning, partnerships and growth. Working from Warsaw, Poland, he brings a European venture-building background to the company, and has helped guide its growth from four people to a team of more than twenty across software, social media, design, video production and systems consulting.

Before and alongside Blue Ocean Creatives, Dawit worked as a ServiceNow developer and consultant at Deloitte Central Europe (2019–2023), building workflows and support systems for internal and client-facing projects. He co-founded LearnGo, a SaaS platform for SMEs and training centres, which he led as CEO from idea to exit, securing EU grant funding along the way. He also co-owned and managed BrewBar Coffee in Poland.

Dawit holds a Bachelor of Information Technology from the University of Information Technology and Management (UITM) in Rzeszów, Poland, where he graduated with a 5.0 diploma grade, received the Rector's scholarship and was selected for the School of Leaders programme. He is a graduate of the Founder Institute accelerator (Eastern Europe cohort), has completed Y Combinator's Startup School, and is an Entrepreneur in Residence at Google for Startups Campus Warsaw.

Dawit Lake Netere
Co-Founder & Chief Executive Officer

Befekadu runs Blue Ocean Creatives' day-to-day operations, client delivery and commercial function from Addis Ababa, leading more than 23 full-time staff across three cities. He sets strategy for every one of the company's 50+ social media accounts and leads the creative director, social media managers and project managers who deliver them. On the technology side he leads client pitches and live system demonstrations, signs every ERP and software contract, and prepares the company's proposals and tenders.

His career began in front of the camera, in television commercials for Commercial Bank of Ethiopia, Dashen Bank, Dashen Beer and Harar Beer. He joined Raphon Advertising in August 2022 as a content writer, social media manager and website developer, and was promoted to Digital Development Manager within six months, leading websites, company profiles and service catalogues for corporate clients. He co-founded Blue Ocean Creatives in April 2023, trained its founding team, and also co-founded Chekela.

Befekadu holds a BSc in Computer Science from HiLCoE School of Computer Science and Technology (2023), where he graduated top of his class with a CGPA of 3.72. He taught paid ad management in the company's social media training course and is the on-camera host of its ERP education series on TikTok.

Befekadu Feleke
Co-Founder, General Manager & Chief Operating Officer

Nathnael leads the social media wing: its social media managers, designers, videographers, editors and hosts. He sets creative direction and campaign concepts for the company's health, hospitality and education accounts, including Lavish Medical Spa in all three cities, Peniel Training Institute, Liesak Resorts Hotel and Fikreselam General Hospital, and approves all creative before it reaches the client. He brings agency experience as Project Manager and Content Writer at Raphon Advertising, where he supervised social media advertising operations and video production.

Nathnael Zerihun
Creative Director and Head of the Social Media Wing

Michal leads Blue Ocean Creatives' financial strategy, planning and financial controls, and supports the leadership team on business planning, growth and partnerships.

Michal Cal
Chief Financial Officer

16. Our Team

23+ full-time staff across Addis Ababa, Dire Dawa and Adama, supported by a pool of contract hosts, trainers and videographers.

Our team combines software engineers who build our platforms, implementers who configure them on the factory floor, and creatives who tell our clients' stories. Every engagement has a named project lead, and the people who build a system are the same people who support it after go-live.

15+ Full-time staff at headquarters in Addis Ababa.

5+ Full-time staff in Dire Dawa (IT and social media).

3+ Full-time staff in Adama (social media production)

Finance & Administration

- Finance and accounting.
- Human resources.
- Office administration and support.
- Legal advisory.

Contract pool

- Social media hosts, trainers for IT implementations and freelance videographers for large productions.

17. How We Deliver

Our implementation method for business systems.

Phase	What happens	What you receive
Discover	On-site workshops with each department to map current processes, documents and pain points.	Requirements analysis
Design	Requirements become system design, workflows, roles and approval chains	System requirements document and signed scope.
Configure & build	The platform is configured and client-specific features are built in iterations, with regular demonstrations.	A working system and progress demos.
Migrate & integrate	Items, customers, suppliers and opening balances are cleaned and loaded; biometric and other devices are connected.	Migration sign-off and integration tests.
Test	Your own staff test real scenarios in user acceptance testing. Every issue is logged, prioritised and closed.	UAT report and sign-off.
Train and go live	Role-based training on site, a parallel run where needed and go-live support.	Training records, user guides and go-live report.
Support & improve	Post-launch support, issue resolution, enhancements and periodic reviews.	Support log and delivery report.

Our commitments

- **Structured delivery.** A named project lead, a written scope, agreed milestones and sign-off at every stage.
- **Documented from day one.** Requirements analyses, system requirements documents, UAT records and delivery reports are standard on every software project.
- **Your process, respected.** We digitise the documents and approval chains your team already trusts, instead of forcing a foreign template on them.
- **Local support.** On-site support from our teams in Addis Ababa and Dire Dawa, and remote support nationwide.
- **Honest reporting.** Marketing results reported from platform analytics, with evidence available on request.
- **Confidentiality.** Client data is used only to deliver the agreed service.

18. Where We Work

- **Addis Ababa, Headquarters:** Leadership, engineering and product, ERP implementation, creative studio and account management.
- **Dire Dawa:** Resident IT team for on-site ERP implementation and support for manufacturers in the east, and a social media production team with Somali and Afaan Oromoo hosts.
- **Adama:** Resident production team (since April 2025) handling Lavish Medical Spa Adama and regional content.
- **Nationwide:** Our systems run in businesses across Addis Ababa and regional cities, and in Djibouti.
